About Me

AI-focused Full-Stack Developer with hands-on experience building secure, production-oriented web and AI-powered applications using Python, JavaScript, and modern frameworks. Proven ability to design and integrate AI agents, RESTful APIs, and responsive frontends with a strong emphasis on clean architecture, authentication, and data security. Experienced in delivering real-world projects involving LLM integrations, automation, and user-centric interfaces, with a strong foundation in problem-solving and continuous learning. Some of my projects can be seen through these links. (Github: <https://github.com/Zaincity>), ([ai-humanoid-robotics-textbook](#))

PROJECTS

Personal AI Employee

An autonomous AI employee that proactively manages personal and business affairs 24/7 using Claude Code and Obsidian.

AI - Humanoid Robotics Textbook

A textbook about Ai Humanoid Robotics which was given as an assignment, It uses content from Docusaurus and using RAG, the integrated chatbot guides about the content of Book.

Match making

AI Matchmaking Agent An AI-powered matchmaking agent built with OpenAI-compatible Gemini models, DuckDuckGo web search, and Twilio WhatsApp API to deliver matches straight to your WhatsApp.
